

May 2012 Weather in Review

After a dry and warm April, rapid increases in rainfall in the first half of May 2012 brought rainfall amounts above the average for the month of May at Austin, Del Rio, and San Antonio. A series of disturbances coming out of the southwest U.S. and across Texas brought widespread rain. Much drier conditions followed from May 16th to the 30th. Scattered mostly light rains came May 31st, as scattered showers and thunderstorms developed in advance of and along a late May cold front.

Unseasonably warm conditions in late April continued May 1st to 7th, followed by cooler days May 8th to 16th. A warming trend followed from the 17th to the 30th. The charts below show the daily highs and lows in May of 2012 at Austin, Del Rio, and San Antonio.
